INT-sbp-09	Outsmarting Explosive Behavior A visual System of Support and Intervention for Individuals with Autism Spectrum Disorders Facilitator manual	Judy Endow, MSW Foreword by Brenda Smith Myles, Ph.D.	2009 Pages: 56	AUTISM BEHAVIORS VISUAL INTERVENTION	This revolutionary program is designed to help decrease – and in some cases eliminate – explosive behavior in children with autism spectrum disorders. Tantrums and meltdowns are among the greatest challenges presented by ASD, often leaving parents and educators searching for answers. Outsmarting Explosive Behavior is a visual program, laid out as a fold-out poster, that can be individualized for each user. Four train cars represent the four stages of explosive behavior: Starting Out, Picking up Steam, Point of No Return, and Explosion. By using visuals to appeal to children with ASD, this program makes it easy to help them identify their current state and take steps to decrease the chances of a meltdown.	1

INT-teacch-05	Behavior Mapping A visual Strategy for Teaching Appropriate Behavior to individuals with Autism Spectrum And related Disorder	Amy Buie	2013 Pages: 50		Grounded in evidence-based practice, Amy Buie's Behavior Mapping is a groundbreaking way of motivating children to make good choices and learn new skills. Better yet, due to its visual nature, this simple-to- implement strategy is effective for a range of students, regardless of age and ability level. Supported by examples and real-life vignettes, four major categories of maps are presented – Consequence Maps, Complex Behavior Maps, Language Maps, and Problem-Solving Maps – covering major classroom challenges. For ease of use, owners of the book may download Behavior Map templates from AAPC's website.
